## **DETAILED ACTION**

• This office action is responsive to the following communication: After Final Amendment filed on 11/03/2006.

- Claims 29 and 55-57 have been cancelled. Claims 59-85 have been entered and made of record.
- Claims 1-28, 30-54 and 58-85 (renumbered 1-81 respectively) are allowed.

## Response to Amendment

1. Applicant's amendment received on 11/03/2006 has been entered and made of record.

Currently, Claims 1-28, 30-54 and 58-85 are pending in the application.

## Allowable Subject Matter

2. Regarding Claim 1, in the examiner's opinion, it would not have been obvious to have the invention, as claimed, further include the features of having a print section that "prints at least one a sharpness-evaluating pattern and a granularity-evaluating pattern, and wherein the sharpness-evaluating pattern includes more than four kinds of pattern elements, spatial frequencies of the pattern elements are different relative to each other and in each of which 1 to 20 periods of each spatial frequency is aligned". The closest prior art, cited Boxma (US Patent 5,721,623) and Stemme (US Patent 4,344,683), teaches an apparatus for printing a medical image and sharpness-evaluating test patterns on a recording medium. Boxma discloses an apparatus for printing a medical image on a recording medium (see Fig.1 and Col., Line 57-67), comprising: a printing section to print either a medical image or a test pattern for evaluating a

Application/Control Number: 09/995,770 Page 3

Art Unit: 2625

quality of a medical image, on a recording medium, based on the image data (see Fig.1 and Col.2, Line 64-67); a printing condition setting section to set a printing condition for printing a test pattern (see Col.4, Line 4-8 and Col.5, Line 51-52); and a printing condition displaying section to display the printing condition set by the printing condition setting section (see Col.6, Line 6-12). Stemme further discloses the printing of a sharpness-evaluating test pattern along with a photographic image on a film (see Fig.1 (2), Fig.2, Col.2, Line 15-25 and Col.3, Line 33-45), and wherein the sharpness-evaluating test pattern includes at least three kinds of pattern elements (see Fig.2 (e-f) and Col.3, Line 33-45).

- 3. Boxma and Stemme fail to particular teach a print section that "prints at least one a sharpness-evaluating pattern and a granularity-evaluating pattern, and wherein the sharpness-evaluating pattern includes more than four kinds of pattern elements, spatial frequencies of the pattern elements are different relative to each other and in each of which 1 to 20 periods of each spatial frequency is aligned". Therefore, because of these features, which were added in the amendment dated 11/03/2006, Claim 1 is rendered allowable. Claims 1-28, 30-54 and 58-85 are also rendered allowable as they depend on Claim 1.
- 4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Vu B. Hang whose telephone number is (571) 272-0582. The

examiner can normally be reached on Monday-Friday, 9:00am - 6:00pm.

6. If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Twyler M. Lamb can be reached on (571) 272-7406. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

7. Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
